Orchid Tip of the Month: (by Hazel Basuel) Did you know that there are 16 chemical elements essential to plant growth? Oxygen (O), Hydrogen (H), and Carbon dioxide (CO₂) are the most important ones. Fertilizers also supply your orchids with the other necessary nutrients to stimulate proper plant growth and development, such as Nitrogen (N) promotes rapid growth and greening, Phosphorus (P) stimulates root development, and Potassium (K) improves resistance to diseases and quality of the flowers.

G.O.T Orchids Campaign: This meeting the WOS officers and trustees will be wearing lavender colored buttons. **G.O.T.** stands for Got Orchid Tips and we want the members to approach us with any orchid questions (growing, repotting, care, fertilizing, insects, diseases, easy to grow, shade requirements, watering, etc...). We know you have lots of questions, but don't know who to ask.....so look for us.

Orchid Safari to Waianae: Caravanning to west Oahu to buy orchids from the growers on Saturday, Oct 23, 2010, if you're interested, please call Karen Kim at 383-9487.
